certain regions of Europe, also in Latvia where you may find two tick species – <i>Ixodes ricinus</i>
and <i>Ixodes persultcantus</i> . Up to 30% of ticks are infected, therefore Public Health
authorities are advising the anti-tick vaccination (only for TBE).
Practical advice to visitors is – to avoid strolling in forests and in case of finding a tick on your
body apply for medical assistance by calling 113.
Legislation re visiting Official formalities are rather strict, please advise <a href="www.pettravel.com/immigration/latvia.cfr">www.pettravel.com/immigration/latvia.cfr</a>
with pets aboard To enter Latvia, your pet must first be microchipped with an ISO 11784/11785 pet microchip
that is a 15 digit and non-encrypted. If your dog, cat or ferret has a current rabies vaccination
but no microchip, it will have to be vaccinated again after the microchip is implanted and wai
21 days before travel. Latvia does honour the 3 year rabies vaccination for dogs, cats and
ferrets entering the country from outside of the EU. When entering Latvia from another EU
Member State, annual rabies vaccinations may be required.
These formalities are under control of Sanitary Border Inspection of Latvia but in practice the
are not very active in control of visiting yachts, please advise marina office.
